

ORTHOPEDIC SURGICAL REFERRAL NOTE

Patient & Referral Information

Document ID:	PDF-ORTHO-001
Date:	2026-08-04
Patient:	Robert Kim DOB: 1952-03-14 MRN: PT-30091
Referring Provider:	Dr. Nadia Chen, MD (NPI: 1122334455)
Referred To:	Orthopedic Surgery - Total Knee Arthroplasty
Insurance:	Medicare Advantage - BlueCross PPO
Auth Number:	AUTH-2026-KIM-0991

Reason for Referral

74-year-old male with end-stage bilateral knee osteoarthritis, primarily affecting the right knee, with severe functional limitation. Conservative management including 12 sessions of physical therapy and bilateral corticosteroid injections has been exhausted over 18 months. Requesting orthopedic surgical consultation for total knee arthroplasty. Pre-operative cardiology clearance obtained (Dr. Harrison, 2026-07-15).

Active Diagnoses (ICD-10)

M17.11	Primary osteoarthritis, right knee
M17.12	Primary osteoarthritis, left knee
G89.29	Other chronic pain
I10	Essential (primary) hypertension
I50.9	Heart failure, unspecified
D64.9	Anemia, unspecified

Procedures (CPT)

27447	Total knee arthroplasty (planned)
20610	Corticosteroid injection, knee joint
73565	X-ray knee, 4 views bilateral
85025	Complete blood count (CBC)
80053	Comprehensive metabolic panel
97001	Physical therapy evaluation (12 sessions completed)
99213	Office visit, established patient, moderate complexity

Clinical Summary

Patient has KL Grade IV changes bilaterally on plain films (bone-on-bone right knee, Grade III left knee). BMI: 29.4. Pain score 8/10 with ambulation. Pre-operative labs ordered including CBC (CPT 85025), BMP (CPT 80053), and coagulation panel. Patient counseled on risks, benefits, and alternatives to surgery.
